RECEPTION VERY MUCH.

channel 6 again and were not responsible for interference on radios, TV's, tape players ect."

People are being out money to see why their TV's and radios are not working right. People do not know why their having these electrical difficulties the past month or so, we hope this letter will let you know what is going on. As you read this letter please support this effort to solve this problem.

Many items and neccessary equipment is being effected in our households and bussinesses. TV's, radios, telephones, computers, and stereo systems. Tape players play the radio signals with the tape. Any electrical or battery operated playing instruments with speakers receive the radio station signals, burgular alarm system, and baby monitors also receive the radio station signals.

If your receiving the radio station signals on your TV, it will be blocked out, snowy with static, or a blank picture. On your stereo systems and radios you will frequently receive only KOKS radio signals or it will blend in with the station your wanting to listen to.

Many people are confined to their homes due to illness or age, also many young children c enjoy regular programing or items for enjoyment and entertainment.

We are not trying to put the KOKS FM radio station out of business, we are just wanting their radio signals not to interfere with our neccessary household and business items.

We have tried for over a month to get these problems solved. The radio station seems to think everything is okey, but we need to let the station know these problems exist.

These letters will be sent to neccessary offices so we can get help for the people receiving this radio interference. The only way we can stop this is by joining together and letting them know what is happening to the public at large. It is not right for anyone to monopolize or dictate the airways.

WENT TO THIS HOME INSTALLED A FILTER RECEPTION VERY MUCH IMPROVED.

Most people in this area cannot receive channels 6, 15, or 8 during the day due to the radio programing of KOKS. Channel 12 is weak and some music is picked up on it during the daytime hours.

The radio station shuts down at 6:00 p.m. and starts again during the morning hours. This is only temporary, they are going to 24 hour broadcasting 100,000. watts very soon.

We have been told by the KOKS radio station "We will be staying on the air, everything will stay like it is and you might as well get use to it. You will never be able to pick up channel 6 again and were not responsible for interference on radios, TV's, tape players ect."

We have been told by the KOKS radio station "We will be staying on the air, everything
will stay like it is and you might as well get use to it. You will never be able to pick up
channel 6 again and were not responsible for interference on radios, TV's, tape players ect."

People are being out money to see why their TV's and radios are not working right. People
do not know why their having these electrical difficulties the past month or so, we hope this
letter will let you know what is going on. As you read this letter please support this effort
to solve this problem.

Many items and neccessary equipment is being effected in our households and bussinesses.
TV's, radios, telephones, computers, and stereo systems. Tape players play the radio signals
with the tape. Any electrical or battery operated playing instruments with speakers receive
the radio station signals, burgular alarm system, and baby monitors also receive the radio
tation signals.

If your receiving the radio station signals on your TV, it will be blocked out, snowy with
static, or a blank picture. On your stereo systems and radios you will frequently receive only
KOKS radio signals or it will blend in with the station your wanting to listen to.

Many people are confined to their homes due to illness or age, also many young children
enjoy regular programing or items for enjoyment and entertainment.

We are not trying to put the KOKS FM radio station out of business, we are just wanting
our radio signals, not to interfere with our neccessary household and business items.

We have tried for over a month to get these problems solved. The radio station seems to
think everything is okey, but we need to let the station know these problems exist.

These letters will be sent to neccessary offices so we can get help for the people
receiving this radio interference. The only way we can stop this is by joining together and
letting them know what is happening to the public at large. It is not right for anyone to
monopolize or dictate the airways.

In re: KOKS(FM), Poplar Bluff, MO
Calgary Educational
Broadcasting Network
BLED-880906KB

Dear Mr. Stewart:

This is in reference to the above-captioned KOKS(FM) license granted January 4, 1989 and to the 698 interference complaints filed with the Commission's Kansas City, Missouri Field Office (FOB). This case has been referred by FOB to the Mass Media Bureau's FM Branch on March 15, 1989. KOKS(FM) was granted Program Test Authority on September 27, 1988. It appears that objectionable blanketing interference continues to be caused to people in the Poplar Bluff, Missouri area by the operation of KOKS(FM).

Section 73.318 of the Commission's Rules states, in pertinent part, that licensees must satisfy all complaints of blanketing interference which are received by the station during a one year period. The period begins with the commencement of program tests (September 27, 1988). Resolution of complaints shall be at no cost to the complainant. These requirements specifically do not include interference complaints resulting from malfunctioning or mistuned receivers, improperly installed antenna systems, or the use of high gain antennas or antenna booster amplifiers. Mobile receivers and non-RF devices such as tape recorders or hi-fi amplifiers (phonographs) are also excluded. For your station the blanketing contour extends 2.45 miles in the major lobe. Since you are employing a directional antenna, your blanketing contour may vary based on the directional antenna pattern.

Accordingly, KOKS(FM) must submit a detailed report within 45 days from the date of this letter. This report is to address the steps taken to resolve all interference complaints received to date for which KOKS(FM) is responsible under the Commission's Rules. The following information should be supplied for each complaint listed on the enclosed attachment:

1. What type of interference was reported.
2. Whether or not the interference was in the blanketing area.
3. The dates and description of the assistance provided by KOKS(FM).
4. Whether or not the interference has been resolved.

FEDERAL COMMUNICATIONS COMMISSION

Docket No. 92-122 Exhibit No. MMB20

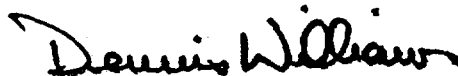

Presented by MMB Identified 11/12/92

Disposition: Received 11/12/92
Rejected

Reporter B. Lord
Date

The report should also contain a map showing KOKS(FM)'s transmitter site, the blanketing contour (115 dBu) and the homes of all complainants plotted on it. In addition, KOKS(FM) is required to file with the Commission two progress reports. The first progress report will be filed 15 days from the date of this letter and the second progress report will be filed 30 days from the date of this letter. The first progress report should contain the map showing KOKS(FM)'s transmitter site with the blanketing contour plotted on it. These reports are required to keep the Commission informed of KOKS(FM)'s progress in resolving the objectionable interference.

Sincerely,

Dennis Williams
Chief, FM Branch
Audio Services Division
Mass Media Bureau
